

SRA3 DIGITAL

SELF-ADHESIVE SHEETS

GlobalTAC

SRA3 DIGITAL SHEET-TO-SHEET SOLUTIONS FOR PREMIUM EFFICIENCY

Serve a growing market for **versatility, responsiveness, efficiency and sustainability!**

Digital printing is more than an economic necessity for shorter runs – the positive commercial drivers include new modes of marketing and a strong commitment to respect the environment. Marketing companies are moving from mass campaigns to more effective personalized and customized messages for groups and individuals. Furthermore, to print only what is needed, when it's needed (JIT) makes it the digital partners part of the value chain to ensure long-term sustainability (low sheet stock level).

When is digital printing the best choice?

In all kinds of self-adhesive end uses with variable information printing. These include food labels, transport & logistics, direct mailing, business forms, tags, or product labels, just to give you a few examples.

THE GLOBALTAC DIGITAL RANGE offers a wide range of products suitable for multiple substrate types and labeling conditions.

Productivity for profitable business

GlobalTAC digital products give an exceptional return on investment. Excellent lay-flat properties provide consistently reliable print runs even at the highest speeds, and efficient, compact stacking in printer trays. Dedicated bleed-resistant adhesives keep sheet edges clean – minimizing residue to prevent printer jams and extend maintenance intervals.

Unbeatable digital image quality

The paper and filmic products in GlobalTAC's digital range support unbeatable print definition and high-resolution graphics. Each product is thoroughly tested for top performance in high-speed dry toner laser printers. Selected materials are guaranteed for optimal liquid toner anchorage with HP Indigo.

Maximum convenience for label users

Precision back-scoring allows label users to remove the backing quickly and smoothly. Label application is fast, and the label quality carries through to the final informational or decorative use.

LABELS ARE MORE SUSTAINABLE THAN EVER!

All UPM Raflatac production facilities in the US, Europe, South Africa, China and Australia have ISO 14001 environmental management certification. Label paper faces in the digital range are FSC-certified to guarantee that the materials are sourced from sustainably managed forests, and the water-based acrylic adhesives are free from solvents.

Digital papers specified for direct food contact are available with a **Declaration of Conformity (DoC)** mandatory in the EU (EU 10/2011) for all components of food-contact packaging.

The GlobalTAC Digital range is in compliance with the European standard **(EN 71-3:2013) for toy labeling**.

Matt white polyester film complies with **BS5609 approval for marine transportation**. It ensures that dangerous goods transported by sea should be durably labelled and identified.

Safe labels: GlobalTAC self-adhesive laminate products comply with **REACH, EU Regulation (EC) No 1907/2006 and RoHS Directive 2011/65/EC**, among other European norms.

THE KEY FEATURES

GlobalTAC offers specially developed paper and film solutions for digital sheet-to-sheet label printers. These products excel in all the essential requirements for self-adhesive sheets:

- **Adhesives specially developed** to withstand the heat of laser printing, and to keep printer contamination to an absolute minimum, which extends maintenance intervals and reduces downtime.
- **Optimal lay-flat** when feeding through printing machinery, reducing the risk of paper jams during printing and further maximizing efficiency after printing when stacking, die-cutting and guillotining.
- **Good dry toner (laser) or liquid toner (HP Indigo) anchorage** for premium print results.
- **Minimal static electricity** after printing even with film label faces, giving higher post-printing efficiency when stacking, die-cutting and guillotining. Additionally our glossy polyesters films have an innovative **StaticOUT™** feature for reducing more the effects of static electricity.
- **Safety packaging** with boxes of 250 sheets. An inner tray optimizes the handling of sheets and allows efficient storage without damaging the material inside the box. Standard boxes of 100 sheets also available.
- **Standard sheet sizes: 32x45 and 33x48 cm**. Other sizes available under request.
- **Backing combinations** vary depending on the face material. Papers are combined with a Kraft backing of 86 gr/m² and Films with a Kraft backing of 120 gr/m². Option of **backing with scores** is available. When scoring, scores should be parallel to feeding direction.

We work closely with printer manufacturers representing a variety of digital technologies. We make extensive performance tests of sheet-to-sheet label materials on digital printers.
