for more details:

F105

PS50-TB

The case former folds the bottom flaps of boxes entered into machine by an operator, allowing a time saving of 50%.

The F105 case former machine automatically folds the bottom flaps of the box manually entered by an operator. The box with the bottom flaps folded remains in vertical position for filling operation. Subsequently it could be pushed through a pneumatic cylinder in a "fixed format" case sealer machine for sealing with adhesive tape.
