

Re-board® Premium Black is the original rigid paper board. It is incredibly lightweight yet exceptionally strong and fully recyclable. The unique engineered fluted core of Re-board® ensures excellent planar flatness combined with design flexibility to create any shape.

Re-board® Premium Black can be digitally printed or finished to achieve stunning results. The smooth, matte surface gives a natural and exclusive finish, and an astonishing print reproduction,

Re-board® fluted core is tilted to 15°, a prize-winning design that recognizes the original Re-board®. The engineered core allows the perfect strengths to weight ratio and enables a Re-board® sheet to be rapidly cut into any conceivable shape with perfect lines, angles and shapes. The accurate cutlines make mounting easy and reliable.

Re-board® Premium Black liner and core are made from 100% recovered fibres.

Re-board® Premium Black liner and core contain no plastics and are made of 100% paper.

Certified Management Systems

Re-board® Premium Black is produced in Norrköping, Sweden.

The production facility is FSC Chain of Custody certified according to FSC-STD-40-400

Re-board® Premium Black contains no harmful components and utilizes water-based adhesives. The board can be recycled as paper in normal wastepaper streams found throughout the world.

Re-board® is the first rigid paper board in the world to independently measure its CO2 emissions. Based on CEPI and ISO 14040 guidelines.
